

Position description:

Maintainer 1

Reporting to:

Generation Team Lead Operator/Maintainer

Date:

May 2023

Location:

Waitaki or Manapouri

The role

This role is responsible for day to day cleaning on-site and provides support to our maintenance teams by ensuring general facilities are cleaned daily and to a high standard. It also requires commercial cleaning of generation plant and equipment and involves working in confined spaces.

Position accountabilities

- Ensuring at all time the safety of yourself, your team and members of the public when undertaking work,
- Ensuring all assigned jobs are completed to the required standard and on time
- Undertaking a broad range of general cleaning work safely, including (but not limited to):
 - Cleaning floors, windows, kitchen and ablution areas
 - Cleaning industrial plant as part of the generation asset maintenance programme,
 - Removal of rubbish and processing of recycling,
 - Regular cleaning in and around generation plant and structures such as the brake pit (classified as a confined space).
 - Managing the availability, storage and safe handling of any cleaning products required to complete the above activities.

Position accountabilities (continued)

- Actively identifying hazards/risks and reporting them accordingly and taking personal responsibility for the safety of you and those around you;
- Ensuring all safety procedures and guidelines are followed.
- Participating in safety training and applying this knowledge when cleaning generation plant and equipment.

Candidate profile

Knowledge, experience and skills

- Previous experience working within the electricity industry is preferable but not essential
- Experience working within an industrial or commercial cleaning environment
- Competence using a wide range of commercial cleaning tools and equipment
- Safety first attitude
- Excellent eye for detail
- Strong communication skills

Meridian.

The Power to
Make a Difference.

Position description:

Maintainer 2

Reporting to:

Generation Team Lead Operator/Maintainer

Date:

May 2023

Location:

Waitaki or Manapouri

The role

This position involves a mixture of both general maintenance work such as minor repairs and installations, and any other relevant activity involved in the upkeep and maintenance of our Hydro Assets. It also involves commercial cleaning of generation plant and equipment, along with day to day cleaning on site and ensuring all areas are cleaned to a high standard.

Position accountabilities

- Ensuring at all time the safety of yourself, your team and members of the public when undertaking work
- Ensuring all assigned jobs are completed to the required standard and on time.
- Undertaking a broad range of general cleaning and minor maintenance, including (but not limited to):
 - Cleaning floors, windows, kitchen and ablution areas,
 - Cleaning industrial plant as part of the general asset management plan

Position accountabilities (continued)

- Undertaking a broad range of general maintenance and vegetation control work, including (and not limited to):
 - Water blasting and removal of rubbish and processing of recycling
 - Undertaking some general trades assistance duties such as repairs, installation and improvements to doors, gates, fences, signs, plumbing, drainage and painting
- Other general maintenance functions associated with the upkeep of buildings, grounds and structures
- Managing the availability, storage and handling of any cleaning products required to undertake the above activities.
