

Position description:

Electrical Fitter

Reporting to:

Team Leader - Trades

Date:

September 2022

Location:

Mid Waitaki

The role

You'll be part of a dedicated team, responsible for running NZ's most significant and iconic generation assets at world-class performance and safety standards.

As an Electrical Fitter, you'll be on the front line of our maintenance delivery and fault response team. You'll execute maintenance plans, respond to faults and emergencies, and contribute to project work. Your skills will ensure that work is done safely, accurately, and on time. Although the role's focus will predominantly be on sites in the mid and upper Waitaki areas, Meridian is NZ-wide operation and there may be the requirement of short periods of travel to suit the operational needs of the business.

Position accountabilities

- Repairing, maintaining and installing electrical equipment in accordance with Meridian standards and electrical regulation.
- Effectively investigate and resolve faults.
- Achieve and maintain the competencies necessary to hold access permits to apply and remove safety isolations and operate plants under remote supervision from our Generation Control Centre.
- Maintain a clear understanding of the scope of work for all work undertaken, ensuring assigned work is completed to specification, budget and on time.
- Manage all documentation relevant to the role, ensuring accurate information is recorded and completed on time.
- Participate in the on-call roster as required, providing immediate response and resolution to faults and defects.
- Be responsible for personal, team and public safety, ensuring all safety procedures are followed.
- Actively identify and mitigate hazards and risks and report them accordingly.

Meridian.

The Power to
Make a Difference.

Position accountabilities continued

- Promote continuous improvement using an innovative approach to work.
- Build and maintain collaborative working relationships.
- Provide constructive and helpful supervision and support to apprentices and other developing junior staff.
- Proactively develop your knowledge and relevant role competencies in relation to industry standards, rules and regulations and participate in training requirements and opportunities.

Knowledge, experience and skills

- Demonstrated knowledge and understanding of Maintenance Management systems
- Experienced in fault finding control systems
- Experience in reading and interpreting electrical and mechanical drawings
- Demonstrated commitment to Health and Safety requirements in the workplace
- Excellent communication skills
- Ability to work well as part of a team and proactively as an individual
- Excellent attention to detail
- Some experience of reporting/document maintenance
- Confident administration/PC skills
- Current, full, clean driver license
- Experience in heavy rotating plant maintenance and working with hydro generation equipment would be an advantage

Education

- Trade or Advanced Trade Certificate in Electrical Trades

Our purpose

Clean energy for a fairer and healthier world.

What we value

Customers, Safety, Sustainability, People.

Our behaviours: 'How to Be'

Be gutsy, Be a good human, Be in the waka.
