

SINGLE CORPORATE SERVICES

DIGITAL SERVICES

Job title:	Technical Services Supervisor	To be completed by HR <i>Job Reference Number</i>
Reporting to:	Technical Services Manager	
Accountable to:	Associate Director of IT	
Pay Band:	B7	

As part of the Single Corporate Service, this role provides a service across both Isle of Wight NHS Trust and Portsmouth Hospitals University NHS Trust.

The intention for the existing primary work locations to remain unchanged as there is no desire to change base locations unnecessarily. However, as the single corporate service will be delivered across both organisations, individuals may be required to undertake business travel from time to time. The staff mobility local agreement will apply.

For our leaders managing staff across multi-site locations, they will need to be visible and provide in person leadership. The arrangements and frequency will be agreed locally.

Job purpose

Play a lead specialist technical role in the provision of effective, efficient and fully integrated IT operational services that maximise their availability and integrity for end-users and optimise the value gained by the Trust from its investment in IT. This will be achieved by:

- Delivering new and modified IT systems that address IT security, performance and availability & lifecycle requirements
- Supporting software and hardware installations, specifications, testing and service transition within datacentre services and end user solutions
- Supporting the Trust in meeting business objectives by contributing to assessment of potential technology innovations and, where approved, assisting their implementation
- Supporting the Digital Department's ITIL processes, providing professional guidance in and execution of Incident, Request Fulfilment, Change, Release, Configuration, Problem, Performance, and Availability Management
- Applying operating procedures for all systems hosted within the Trust Data Centres so they are operating at their optimum performance, availability to IT users and integrity of their data
- Providing specialist and professional support across the three primary functions within Information Technology: Operations Centre, Service Operation and Infrastructure Services
- Deputise for Technical Services Manager as required, acting as an escalation point

Job summary

Team Management

- In the absence of the Technical Services Manager, ensure tasks are appropriately prioritised and scheduled, skills appropriately utilised, procedures documented and followed, adequate coverage for absence and Out-of-Hour's support is in place, and consistent, up-to-date documentation is established and maintained.
- Monitor performance standards for the Technical Services team, monitoring achievement against these, and devising improved ways of working, working with the Technical Services Manager.
- As a team leader, take a lead role in the daily scrum held within the team to ensure the team collaboration and focus is aligned to the business outcomes.
- Play a leading role in contributing to the Technical Services team working processes and operating procedures.
- Facilitate Triage of incoming workloads and allocation of work throughout the team as required.
- Ensure that Technical Services team and external contractors work in a responsible and safe manner and have due regard for health and safety regulations.

System Design & Hosting

- Working alone on IT systems and modifications to existing IT systems, or with partners, vendors or colleagues on more complex systems. Specifies user/system technical requirements, including the overall management of the system implementation and transition.
- Executes test plans, to verify correct operation of completed system implementations.
- Documents all work using required standards, methods and tools, including internal tools where appropriate.
- Prepares and maintains operational documentation for relevant system software within the Group Data Centres. Advises other IT staff on the correct and effect use of system software.
- Collects performance data to monitor system efficiencies against either published service level agreements or vender best practice thresholds. Monitors both resource usage and failure rates of installed systems and provides feedback to Technical Services & other Digital management Teams.
- Gathers performance statistics from the hosted IT Systems to enable recommendations for the tuning of System Infrastructure. Initiate system software parameters to maximize throughput and efficiencies.

Software and Hardware Installation

- Enables the software builds ready for loading onto the target hardware. Held within a standard configuration arrangement, conducts a series of tests and records the details of any failures.
- Enables test specifications as required for testers to follow, carries out fault diagnosis relating to extreme complex problems as part of installations, reporting the results of the diagnosis in a clear and concise manner.
- Installs or removes hardware and/or software, using installation instructions and tools, follows agreed standards. Adheres to the IT Change and Release Management Process for all software and hardware changes.
- Reports details of all hardware/software items that have been installed and removed so that configuration management records can be updated.

- Contributes, as required, to the development of installation procedures and standards.

Infrastructure Developments/Innovation

- Contribute specialist expertise to the development and innovation of IT technical strategies and wider IT strategies as appropriate.
- Manage the successful implementation of visible end-user elements within approved IT development projects to meet project timescale and budgetary targets.
- Keep abreast of IT developments and technologies in order to effectively carry out the duties of the post and make recommendations for bringing benefits to our customers and improving service delivery.
- Participate in rota system for on-call services (currently 1 week in 6-8)

Organisational Chart

Key Responsibilities

Communication and Working Relationships

- Responsible for engagement of clinical and non-clinical stakeholders across the organisation and wider health system, managing their potentially conflicting views and priorities.
- Development of communications plans, reflecting the information needs of all stakeholders.
- Responsible for producing clear, concise highlight reports on plans, progress, risks and issues for the project board and exception reports where project tolerances are breached.
- Rapidly building strong relationships with all parties – staff, contractors, suppliers and other project stakeholders – to actively manage their contributions to project deliverables.
- Able to present clearly and persuasively (both formally and informally) to stakeholders within the trust and wider healthcare system the benefits, plans and progress of projects.
- Manage difficult situations and sensitive matters when liaising with operational staff to identify efficiencies and other matters that may lead to an operational change.

- Able to use enhanced communication skills to communicate highly complex and sometimes contentious information which may or may not require negotiation and persuasive skills.

Analytical and Judgement

- Required to monitoring the delivery of all elements of schemes, analysing large amounts of complex information, from multiple sources and often under pressure of time, to identify risks and issues that might derail the project.
- Identify and manage interdependencies and prioritise actions to mitigate these, escalating to the project board for support when required.
- Drawing on expert support where needed, analyse, map and review current state processes and pathways across multidisciplinary teams
- Work with relevant leads to identify benefits from project activities and ensure that these are documented and actively managed
- Required to use own judgment and to interpret and analyse highly complex facts and undertake research to compare these to different options available
- Act as point of contact and point of escalation for IT Operational Security queries and requests
- Take a hands-on role in IT Security event and incident management, seeing through to resolution
- Maintain a good working knowledge of current security risks and evaluate against current processes, suggesting and implementing improvements as required
- Work with the IT Security Architect to assist with development of the IT Security Strategy, providing feedback and suggestions on the tools required
- Maintain an understanding of Information Governance to ensure that IT Security policies and processes adhere to Trust requirements
- Provide internal auditing and monitoring to prevent unauthorised security changes
- Work with the IT Security Architect and IT Specialists to provide technical risk analysis for any potential security issues that may be encountered

Planning and organising

- Responsible for all aspects of the day-to-day running of project(s) ensuring the project remains within agreed tolerances for time, budget and scope and, where this is at risk, developing alternative plans and submitting exceptions reports to the project board for consideration.
- Create, launch and execute robust project plans, articulating milestones, timescales, stakeholders etc., using appropriate project management methodologies that consider differing views of project stakeholders
- Ensuring all risk and issues are documented and those that need them have mitigation plans in place.
- Ensure that all records and information are maintained in a way that allows up-to-date and timely information to be available and ensure that good configuration management is adhered to.
- Plan and organise on multiple complex projects and instrumental in adapting these if required.
- Oversee the Change Management process with a view to continuous improvement of the overall process in line with the operational policies and objectives and the Department and Trust
- Review and oversee all changes submitted, assessing possible impact and urgency, ensuring appropriate approvals are obtained and scheduling agreed and communicated clearly and effectively
- Maintain a Forward Schedule of Change, ensuring this is communicated to all interested parties and available for reference at all times

- Investigate failed or incomplete changes to determine if useful lessons can be learned and work with other teams to reduce the number of failed changes
- Regularly review and report on the effectiveness of Change, identifying patterns and feed back into the review process
- Schedule and facilitate Mini-CABs as required to review more complex changes where there is a high level of complexity or risk
- Oversee the Patch Management process, suggesting improvements where possible
- Management of the Patch Management schedule
- Reporting of current Patching status
- Management of Patching workload and scheduling/communication with affected parties
- Maintain awareness of product releases, support and vulnerabilities, ensuring that Patch Management is in place to minimise operational risk

Physical Skills

- Ability to concentrate on complex tasks with frequent interruptions
- Energetic and resilient
- Clear verbal and written communication
- Able to work on a daily basis with computers/ keyboard

Patient Client Care

- No direct patient care.

Policy and Service Development

- To contribute to the ongoing development of processes and methodologies that support the successful delivery of projects and programmes of work
- Encourage innovation and identify opportunities for continual improvement.
- Contribute to target setting, policy development and monitoring and evaluation for improvement of performance in project area
- Advocate persuasively for the use of relevant project management and improvement methodologies across all project stakeholders.
- Responsible for implementing policies for the division.

Financial Management

- Responsible for the management of appropriate project budget ensuring the project is delivered within the scope of the budget.
- Responsible for management of all project resources under delegated authority of project board, within agreed project tolerances.
- Responsible for maintaining full records of actual and forecast expenditure against both capital and revenue budgets
- Advise on project resource costs as part of business case development

Management/Leadership

- Responsible for the line management of a department
- Contributes, with input of the programme manager, to the development of more junior staff in understanding and use of project management methodology

- Train project stakeholders on project management methodologies, including project board members on their own roles
- Line Management of IT Specialists with a focus on IT Operational Security and Patch Management
- Workload management and scheduling of IT Security Requests and Incidents, ensuring timely resolution in line with agreed SLAs
- Develop performance standards and objectives (SMART) for IT Operational Staff, monitoring achievement against these and devise improved methods of working
- Complete Performance appraisals of members of IT Operational staff, agreeing development needs and identifying and implementing appropriate training and development opportunities. Ensure that these contribute towards department and team objectives
- Ensure that IT Operational staff work in a responsible and safe manner in line with Trust and Departmental policies and procedures
- Participate in day-to-day event management to support the objectives of the larger IT Service Delivery Team
- Ensure IT Operational events are dealt with and responded to in a timely fashion and follow agreed SLAs and processes
- Maintain a good working knowledge of the IT and Applications Infrastructure
- Ensure communications with all affected parties both internal to IT, to the Trust and relevant Third Parties are timely, accurate and informative

Information Resources

- Responsible for maintaining accurate records within the Trust's project and programme management system, including regular highlight reporting, project planning, risk and issue management, and benefits identification.
- Expert use of standard office productivity software (Microsoft 365) for collaboration on project outputs and analysis and visualisation of progress (e.g. Gantt charts, burn down charts, financial tracking)
- May act as champion for one or more IT systems introduced through project work
- Required to develop statistical reports which will be comprehensive to enable these to be shared in multiple forums including executive reports

Research and development

- Undertakes complex surveys/audits relating to project benefits.
- Benchmarking with other Trusts and exploring lessons learned
- Responsible for their own learning and development including identifying and researching any areas of learning that add to the knowledge base within the programme

Freedom to Act

- Full responsibility for the day-to-day management of projects with freedom to act delegated from the project board.
- Full autonomy from project initiation through to project closure – provided project remains within agreed tolerances for time, cost and scope board oversight is by exception only.
- Act as source of expertise for project and programme management, applying this as needed to deliver project outcomes.

Physical effort

- A combination of sitting, standing, and walking with little requirement for physical effort. There may be a requirement to exert light physical effort for short periods.

Mental effort

- There is a frequent requirement for concentration where the work pattern is predictable with few competing demands for attention, or there is an occasional requirement for concentration where the work pattern is unpredictable.

Emotional Effort

- Exposure to distressing or emotional circumstances is rare, or occasional indirect exposure to distressing or emotional circumstances.

Working conditions

- Requirements to use Visual Display Unit equipment more or less continuously on most days.

Person Specification

Criteria	Essential	Desirable	<i>How criteria will be assessed</i>
Qualifications	• ITIL v3 Foundation • Degree-level Qualification or equivalent in a Computing or analytical field • Technical Accreditation in one or more of the following: - ○ Microsoft MCP/MCSA/MCSE ○ Cisco CCNA ○ CISSP Security Professional ○ CEH Ethical Hacker		Application and Interview
Experience	• Considerable Hands-on technical experience in the majority of the following: - ○ Microsoft Windows and BackOffice Servers (SQL Server, Exchange) ○ App-V or alternate Application Virtualisation solution ○ Citrix XenApp ○ Cisco Switches and ASA and general networking		Application and Interview

	○ SAN technologies (Block and File) ○ AppSense ○ VMware/Server Virtualisation ○ Security Event Monitoring/Aggregation ○ Event Monitoring solutions (Solarwinds Orion preferred)		
Knowledge	• Good knowledge of Data Protection and Information Security/Governance • Knowledge and understanding of Change Management processes and procedures		Application and Interview

Compliance statement to expected organisational standards.

To comply with all Trust Policies and Procedure, with particular regard to

- Risk Management
- Health and Safety
- Confidentiality
- Data Quality
- Freedom of Information
- Equality Diversity and Inclusion
- Promoting Dignity at Work by raising concerns about bullying and harassment
- Information and Security Management and Information Governance
- Counter Fraud and Bribery

The Trust has designated the prevention and control of healthcare associated infection (HCAI) as a core patient safety issue. As part of the duty of care to patients, all staff are expected to:

Understand duty to adhere to policies and protocols applicable to infection prevention and control.

- Comply with key clinical care policies and protocols for prevention and control of infection at all time; this includes compliance with Trust policies for hand hygiene, standards (universal) infection precautions and safe handling and disposal of sharps.
- All staff should be aware of the Trust's Infection Control policies and other key clinical policies relevant to their work and how to access them.
- All staff will be expected to attend prevention and infection control training, teaching and updates (induction and mandatory teacher) as appropriate for their area of work, and be able to provide evidence of this at appraisal.
- To perform your duties to the highest standard with particular regard to effective and efficient use of resources, maintaining quality and contributing to improvements.
- Ensure you work towards the Knowledge and Skills Framework (KSF) requirements of this post. KSF is a competency framework that describes the knowledge and skills necessary for the post in order to deliver a quality service.

- Your behaviour will demonstrate the values and vision of the Trust by showing you care for others, that you act professionally as part of a team and that you will continually seek to innovate and improve. Our vision, values and behaviours have been designed to ensure that everyone is clear about expected behaviours and desired ways of working in addition to the professional and clinical requirements of their roles.
- Ensure you adhere to and work within local and national safeguarding children legislation and policies including the Children Act 1989 & 2004, Working Together to Safeguard Children 2013, 4LSCB guidance and the IOW Safeguarding Policy.
- Ensure you adhere to and work within the local Multiagency safeguarding vulnerable adults' policies and procedures
- Ensure that you comply with the Mental Capacity Act and its Code of Practice when working with adults who may be unable to make decisions for themselves,
- Ensure that you maintain personal and professional development to meet the changing demands of the job, participate in appropriate training activities and encourage and support staff development and training.
- Respect the confidentiality of all matters that they may learn relating to their employment and other members of staff. All staff are expected to respect conform to the requirements of the Data Protection Act 1998, including the responsibility to ensure that personal data is accurate and kept up to date
- If your employment is to a post that requires you to be registered with a professional body, the continuation of your employment is conditional upon you continuing to be registered with the appropriate professional body. The Trust will require evidence of current registration.
- Proactively, meaningfully and consistently demonstrate the Trust Values in your everyday practice, decision making and interactions with patients and colleagues.
- Perform any other duties that may be required from time to time.
- Contribute to the IT Departments on-call rota and if required, maintain required skills, experience and resource levels allowing for hospital digital 24/7 services.

This job description may be altered, from time to time, to meet changing needs of the service, and will be reviewed in consultation with the post holder.
