

Tube Laser Operator

We have an opportunity for a Tube Laser Operator to join the day shift team at our Andover site. Working 37 hours per week. Monday – Thursday: 07:17 - 15:45 & Friday: 07:15 - 12:30

The role will primarily involve the running of a state-of-the-art Tube Laser Cutting machine, setting, and cutting vital components for all areas of the business.

We are looking for an individual who is capable of working alone and within a team. Cutting parts to a schedule, competent in use of hand tools, measuring equipment & electronic devices for recording quality.

Manual handling is involved with this role, various lifting aids are provided to assist with manual handling.

A forklift truck license or willingness to gain a license would be desirable, but not essential.

The successful candidate will also be expected; where necessary, to undertake other duties as and when production deadlines demand.

No prior experience necessary, all training will be provided.

Key Responsibilities:

- Work independently to complete production requirements to the required standard and timescale
- Quality check completed work and record checks electronically
- Read and interpret drawings and spec sheets
- Utilise cross skilling to ensure operational flexibility to respond to changing business needs / new opportunities
- Work safely and maintain a clean working environment
